	Landscape door (large sizes)			
INDOOR	Swing door		Steel Cork	
	Landscape door (large sizes)			
	Sliding doors (large sizes for tight spaces)			

## ► SHOWCASE STAND

### INSTALL YOUR SHOWCASE WHERE YOU WANT!

No wall space to install your showcase or need to move your showcase? Choose the stand on 4 lockable castors (optional with 4 cylinders) or the stand to be screw sealed. In both cases, the showcase and the stand must be ordered together. Made from rectangular steel tube (60 x 30 mm) in grey RAL 9006.

## ► DOOR MADE FROM SECURITY GLASS OR POLYACRYLATE ?

**4 mm security glass:** it offers high resistance to impacts, break-in attempts and thermal shocks. In case of breakage, the tempered glass breaks into small pieces to avoid cuts. More transparent and more difficult to scratch, glass is also easier to maintain and less electrostatic. Showcases with glass doors are classified as M0. Anti UV glass in option.

**Polyacrylate or Polymethacrylate (PMMA):** This material is lightweight and resistant to impact and weather.

## ► @C7?S

To create a showcases fleet that meets your needs, you may ask for the same or different locks (up to 10).
